PROTERRACE ECO DRIP

VARNISHED/COATED ALUMINIUM

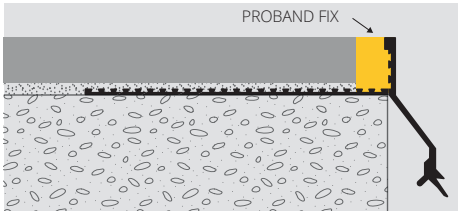

PROTERRACE ECO DRIP is an edging profile in aluminium designed to protect the front of the screed from water penetration and the edges of the tiles laid on terraces and balconies. The profile is equipped with a punched flange that ensures its fixing to the support. The front the profile is equipped with a double drip to improve the push away of water from the wall. To reach a right connection between profile and the waterproofing system it's needed to use **PROBAND 150** with **PROBAND KOLL/AB**. The product is also available on request in **BENDABLE VERSION** and with a **SPECIAL SEASIDE PRE-TREATMENT** which increases its resistance to corrosion when installed at sea front environments.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose "PROTERRACE ECO DRIP" according to the tile thickness. **2.** Cut "PROTERRACE ECO DRIP" to the desired length and fix it to the support with nails. **3.** Apply the desired waterproofing system, sealing the joint between profile and waterproofing. **4.** Lay the tiles, leaving about 5 mm between tiles and profile. **5.** Seal the space between tiles and profile using **PROBAND FIX**. **PROFILE BENDING: 1)** Cut the anchoring flange into sections and engrave the metal close to the vertical side **2)** bend the profile with the help of a template;

HOW TO REQUEST SEASIDE TREATMENT

When placing your order please add S to the article's number
Example: PTEDP 10ALGF (seaside) = ***PTEDP 10ALGFS***

VARNISHED/COATED ALUMINIUM bar length **2,7 lm** - pack. **10 Pcs** - **27 lm**
