KALEIDOS
STONE LINE

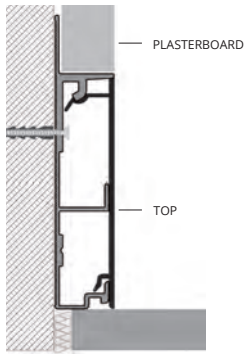

SL05 - Stone gray | **SL18** - Stone white cement

EASY LINE

EYP01 - MATT white varnished **(RAL 9016)** | **EYP11** - MATT black varnished

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Fix the substrate/perforated base to the wall before laying the plasterboard, calculating all the heights and distances. **2.** Lay the plasterboard aligning the lower part flush to the PROSKIRTING FLAT. **3.** Plaster and carry out the surface finishing on the plasterboard. **4.** Choose the required Top finish, cut and lay the profile fitting the lower part and then the upper part by pressing gently. **IMPORTANT:** Pay attention to the external edges of the aluminium Proskirting. They must be protected against agents such as adhesives and sealants and against grinding or scraping actions.
