EXAMPLES OF LAYING

LAYING INSTRUCTIONS
1. Choose the "SKIRTING 60" also choose with or without adhesive. **2.** Cut the profile to the required length, taking care to calculate the width of the inside-outside corner joints. **3.** For the self-adhesive version, the surface must be smooth, grease-free and not porous. It is not recommended for plaster and mortar surfaces (version without adhesive is better, using fast-setting acrylic silicone which is suitable for fixing aluminium to mortar - plaster, etc.). **4.** Use the corner linking elements-joints and right and left end caps to facilitate laying.
